2. Individual Member States statistics

The tables below present, for each Member State, the **number of convictions of nationals of other Member States** (EU non-nationals) handed down on its territory **versus** the **number of sent notifications**; the **number of sent requests**; as well as the **number of received requests versus** the **number of sent replies** in the years 2014- 2016.

Portugal and Slovenia were not connected to ECRIS by the end of 2016, so there are no tables for these two Member States. The tables for Bulgaria, Cyprus and Denmark do not contain conviction data as these Member States have not provided the Commission with such data. For France the statistics for 2016 were not available yet.

The information on convictions of EU non-nationals is vital for evaluation whether all their convictions have been notified to the respective Member States of nationality.

In many Member States the volume of notifications on new convictions exceeds the volume of convictions of nationals of other Member States. At request, the concerned Member States informed the Commission about incorrect classification of updates as notifications on

new convictions. In some cases, this disproportion was caused by sending a large backlog of old notifications in a certain year. The Netherlands sent data including not only convictions as defined in the Framework Decision 2009/315/JHA, but also other types of decisions in criminal proceedings registered in its criminal records. The conviction data communicated by these Member States cannot therefore serve for the purpose of analysis of the relation between the convictions and notifications.
